Veneer Anchors
Thermal Concrete 2-Seal™ Wing Nut Anchor
Adjustable Thermal Veneer Anchor

Hohmann & Barnard’s 2X-Hook has been tested and designed to withstand over 200-lbf, in tension or compression, at maximum allowed offset (TMS 402/602-16 12.2.2.5.5.4) of 1 ¼” (disengagement of the pintle from the veneer anchor). These results exceed BIA recommendations and the capabilities of standard “round wire” hooks/pintles by over 100%, while maintaining the ASTM A1064/1064M wire specification.

DRAWINGS FOR ILLUSTRATIVE PURPOSES ONLY

Thermal Concrete 2-Seal™ Wing Nut Tie
An innovative single screw veneer tie for concrete, CMU, or wood stud construction. Featuring a dual-diameter barrel with factory-installed EPDM washers to seal both the face of the insulation and the air/vapor barrier. Projecting Thermal Wings are steel reinforced and coated with flame resistant plastic, creating a thermal break, decreasing thermal transfer through rigid insulation (the plastic is highly flame resistant). The Thermal Wings accept a standard or seismic hook, spin to easily orient pintles/hooks to masonry joints, and provides up to 1/2” of adjustability to account for variations in wall thickness. Made with a 5/16” hex head, install with a standard hex socket. The extra large washer helps secure insulation to backup.

Thermal Concrete 2-Seal™ Wing Nut Anchor: US Pat. No. 7,415,803
2X-Hook: U.S. Pat. No. 8,613,175
Barrel (Stainless Steel): ASTM A580/A580M - AISI Type 304
Screw (Carbon Steel): ASTM A510 (Carbon Steel)
ASTM A954 (1000-hour polymer coating)
Wire (Carbon Steel): Prefabricated from cold-drawn steel wire conforming to ASTM A1064/A1064M
Tensile Strength - 80,000 p.s.i. | Yield Point - 70,000 p.s.i. minimum
Zinc Coating: Hot-Dip Galvanized after fabrication: ASTM A153/A153M-B (1.5 oz/ft²)
Wire (Stainless Steel): ASTM A580/A580M - AISI Type 304 or Type 316
NOTE: Pre-drill a 5/32” (4 mm) hole into concrete, CMU, or masonry backup to a depth of 2” (51 mm).

Thermal Concrete 2-Seal™ Wing Nut Anchor Barrel Finish:
- Stainless Steel - Type 304
- Stainless Steel - Type 316

3/16” Ø Compressed Leg Hook Length:
- 3” (300H-2X)
- 4” (400H-2X)
- 5” (500H-2X)

Compressed Leg Seismic Hook: - Length (Model), 3/16”Ø (5mm) wire
- 3” (300-S-2X)
- 4” (400-S-2X)
- 5” (500-S-2X)

Continuous Wire Finish: (Diameter 9 ga. 3/16”Ø)
- Hot-Dip Galvanized | Stainless Steel

Note: H&B recommends Stainless Steel Wire Ties for maximum protection against corrosion.

H&B recommends 16” x 16” spacing

NOTE: 2X-HOOK CAN BE INSTALLED WITH LEGS POINTING UP OR DOWN.

Thermal Concrete 2-Seal™ Wing Nut Anchor Style*:
- Equal to thickness of insulation
- 1/8” 1” 1 1/2” 2” 2 1/2” 3” 3 1/2”
- 4” 4 1/2” 5”

*NOTE: This anchor requires a 1” (minimum) air cavity.

IMPORTANT: Since each construction project is unique, the appropriate selection and use of any product contained herein must be determined by competent architects, engineers and other appropriate professionals who are familiar with the specific requirements of the project in question.
