Lox•All® Adjustable Joint Reinforcement

170-2X Truss Eye-Wire
Adjustable Reinforcement with 2X-Hook

NEW!
3/16"Ø Compressed Leg
“2X” Hook is 2x Stronger
than the Industry Standard

The embedded portion of the 2X-Hook is 3/16" round wire, satisfying the code requirement that the mortar bed thickness (typically 3/8") must be twice the diameter of the wire.

Hohmann & Barnard’s 2X-Hook has been tested and designed to withstand over 200-lbf, in tension or compression, at maximum allowed offset (TMS 402/ACI 530 6.2.2.5.5.4) of 1½" (disengagement of the pintle from the veneer anchor). These results exceed BIA recommendations and the capabilities of standard “round wire” hooks/pintles by over 100%, while maintaining the ASTM A1064/1064M wire specification.
