

ENVIRO-BARRIER™

FLUID APPLIED AIR/VAPOR BARRIER

With the introduction of **Polyether** and **Silicone** formulations, Hohmann & Barnard now offers an AVB for nearly every condition.

100% system compatibility, GUARANTEED!

ENVIRO-BARRIER™

THE ORIGINAL

- Remains flexible over a wide range of temperatures
- Meets and exceeds the highest industry standards for air/vapor barriers
- UV exposure up to 120 days
- Also available in a vapor permeable formulation
- Can be applied to most types of substrates

ENVIRO-BARRIER™

POLYETHER

- A High Performance Product that can be applied in humid and damp climates
- 20 perm rating
- UV exposure for up to 1½ years
- Can be installed over most types of materials, including gypsum board, wood, CMU and metal

ENVIRO-BARRIER™

SILICONE

- A **VERY** High Performance Product!
- Unlike other AVB products on the market, EB silicone can be installed in temperatures as low as 20°F, allowing contractors to remain productive in the winter
- Can be installed over most types of materials, including gypsum board, wood, CMU and metal
- UV resistant up to **TEN** years
